

## PROCESS AUTOMATION

# In-House, Single-Source Solutions for Complex Systems

**KDC Systems**

A Division of KDC Inc.

An EMCOR Company

### EXPERTISE IN COMPLEX INDUSTRIES:

Biotech and pharmaceuticals

Semiconductor

Food and beverage

- Liquid and dry systems
- Food and Drug Administration sanitary design criteria

Water and wastewater treatment

- Water reclamation
- Wells and pump stations
- Desalination

KDC Systems offers a full range of process automation solutions, including control systems and electrical and instrumentation services. We perform all work in-house with single-source execution, helping reduce costs and ensure outstanding quality control.

### Proven Experience

A broad range of clients rely on our technical expertise to help improve their critical processes. We have in-depth experience in a number of highly sensitive and regulated environments, from sensitive semiconductor and biotechnology plants to complex water reclamation projects and sanitary beverage facilities.

### Outstanding Quality

We focus on seamlessly integrating construction and plant operations to deliver projects on schedule and within budget. Our services include full project validation, so you can be confident your production processes are reliable and that we are maintaining the highest quality standards.

### Strong Foundation

Our process automation services are backed by KDC Inc. and our parent company, EMCOR Group, Inc., an industry-leading Fortune 500 company. This provides us with significant financial support, helping ensure our prices are competitive with small integrators, as well as providing access to a nationwide network of experts.

### WHAT CAN WE DO FOR YOU?

#### KDC Systems

4462 Corporate Center Drive

Los Alamitos, CA 90720
